Saru Shielding Specializes In Supplying Fine Grade Lead Wool For Radiation

Product Information :

SARU Shielding manufactures & supplies various types of Lead wool/lead rope that can be made to customer specification depending upon the end use application for difficult to access areas.

Saru shielding lead wool, a flexible radiation shielding Material, is available in special fine, medium & rough grades for highly effective radiation shielding.

SARU lead wool is also ideal for fitting openings where sheet, plate or bricks are not feasible. It acts as a fast and easy joint material for cast iron, cement, earthenware pipes & for aperture of walls and ceilings.

Applications:

- Radiation Protection
- Water proofing
- Moisture barrier
- Sealing/Caulking joints in gas, water and sewer installations.
