

LEAD SHOTS

STANDARD, CUSTOM

Features :

- Available in specified packing density (6-11.4gm/cc)
- Different granule sizes and blends
- Consistent size and quality
- Certified effective density (certified dose radiometry)

Besides Round Shots request Saru for complete line of Powder, Flake, Pellets, Pulver, Granules in Lead, Tin, Bismuth Cadmium & their alloys

Product Information :

SARU shielding operates a special manufacturing line to produce Fine Grade Lead Shot.

Lead shot made by SARU shielding is of free flowing type, that provides a solution for Dry lead shielding i.e. (pouring lead without heat).

"SARU POWDER & FLAKE" shop manufactures lead shot in various customized alloys and sizes as per customer requirements. SARU shop has multi capacity manufacturing process for Shots, Flakes, Pellets, Granules and Powders.

Applications:

- **Radiation Shielding**
 - Filling/Shielding of Hydraulic Cylinders, Plug Assemblies, containment wall and complementary shielding box etc.
 - Filling cracks and voids for shielding.
 - Mixed with concrete to provide civil radiation shielding
- **Weight Balancing** – or Weight Balancing application in Bridges and balances
- **Ballast** – Blended with epoxy for Boat Ballasts and yacht keels.
- **Steelmaking** - to produce free-machining steels.

Saru does not make any Lead Shot for Shot Gun Ammunition.
